Total Round

4

Difficulty Level

4

ROUND-1

There was 2 section where section 1 contained around 20 Questions based on C/C++ like output based, Fill in the blanks, operators, STL library etc

Section 2 had 3 coding questions where 1st one was easy, 2nd one was average and 3rd one was difficult.

Mode of Examination : They had conducted online exam at our campus.

ROUND-2

Technical Round 1

They started this one with basics questions like oops concept, Inline functions, Friend function, Scope operator, Multiple inheritance (How is it different in JAVA), Virtual Keyword, Abstract Class, STL Library, Data structures (Basics questions on linked list, Queue, Stack, Tree) Also some conceptual questions based on queue & Stack.

They had given me 2 codes and said me to reduce the time and space complexities. A verbal projects discussion.

Lastly they asked me some questions based on Java like interface, generics, serialisation, collections etc.

A verbal projects discussion.

Mode of Examination : Face to Face

ROUND-3

Technical Round 2:

They started with SQL, basic to intermediate level and then they asked about my projects in detailed.

I have mentioned a project based on R language so they asked me some questions of R programming as well.

They said me to write some codes of my projects as well.

Mode of Examination : Face to Face

ROUND-4

HR Round.

Introduction, Family background etc.

HR was actually focusing on my communication skills and confidence

Mode of Examination : Face to Face

Our Question

How was your preparation?

Good

How and what resource you used for the preparation?

Books.

Geeksforgeeks and some other websites as well

Online lectures(YouTube, Udemy, Coursera etc)

How much you were prepared for the interview?

I was nervous before interview because drive was conducted between my end sem examination.

But overall my confidence, skills and knowledge helped me in proving myself.

What kind of student you have been academically ?

Average

Were you part of some extra activities ?

No

Our Question

What was the key subject or point that this interview was more about?

Interview was totally based on my resume. They had asked everything from my resume only

Importance of project/coding profile/resume/cover letter/Linkedin profile/referrals. If any suggestion, please.

Projects and certifications played an important role in this drive

What is your advice to your juniors?

Just be confident on whatever you have mentioned in your CV/Resume.

Any other suggestion if you want to share that ongoing placement student must focus

Just focus on your skills and knowledge. Never compare yourself with others. Be confident. Also keep trying for off campus drives as well because you all know your placement is already affected by Covid19
